Besides, to control the inward and outward bound persons and freight traffic Traffic inspection points were organized at all border-stations. These traffic inspection points being under the direction of the resp. District. These Traffic inspection points dealing with the largest volume of traffic (so-called heavy-traffic T.i.P.s) were under the immediate direction of Headquarters. These were the following (their names are identical with their seats)

Ferihegy (aerial)
Hegyeshalom (waterway, highway, railway)
Csorna
Lökösháza.

The districts have been organized by Headquarters to correspond in strength to a wartime infantry regiment. (Approximately 2000 soldiers). (This comprises the total personnel of all the Units, battalions of the district including the force of those light-traffic T.i.P.s situated in the area.)

From an army this force an infantry company (approx. 120 men) the reserve company plus the officers, NCO-s and troops of the special-service branches of the district were stationed at the seat of the District.

According to battalion-organization an infantry platoon (approx. 40 men) the reserve platoon plus the officers, NCO-s and troops of the special-service branches of the battalion were stationed at the Battalion.

At the level of the Unit 60 men troops were stationed plus the officers and NCO-s of the Unit.

Depending a local factors (volume of traffic, number of entry and exit points their distance from each other) the Traffic T.i.P.s.
